

Subject Index Page 46
 Author Index 51

CLR refers to "Clinical Laboratory Reference 1998-99," the annual supplement to July 1998 *MLO*.

Sept suppl refers to "A comprehensive approach to critical care testing," a special supplement to the September 1998 *MLO*.

SUBJECT INDEX

Absenteeism

Helping employees deal with personal problems (Management Q & A). Aug p. 24

Okay to grant employees unscheduled time off? (Management Q & A). March p. 20

Sick leave policies (Management Q & A). Feb p. 19

Accreditation (see *Inspections/accreditation*)

AIDS

Condom use and AIDS (Letters to the Editor). April p. 9

Cryptosporidium parvum (Letters to the Editor). Oct p. 8

Emerging issues in AIDS: Variant strains of human immunodeficiency virus and its subtypes. Feb p. 32

Health officials recommend rapid HIV test (News Worthy). May p. 8

HIV infection, diagnosis, and treatment: New findings and approaches. Feb p. 22

HIV's latest act of defiance (From the Editor's Desk). Feb p. 6

Home versus lab tests for HIV (Tips from the Clinical Experts). Feb p. 10

Postexposure treatment of HIV (News Worthy). Jan p. 8

Research (News briefs). Aug p. 12

Risks and recommendations for HIV occupational exposure. Sept p. 58

Urine test for HIV testing (News Worthy). Aug p. 10

Alternate-site testing (see *Point-of-care testing*)

Anticoagulation therapy

Low molecular weight heparins: How they work, what they do. June p. 26

Prothrombin time orders (Tips from the Clinical Experts). Aug p. 18

Routine coagulation tests. (Tips from the Clinical Experts). Dec p. 8

Switching from heparin to warfarin (Tips from the Clinical Experts). Aug p. 18

Antimicrobial therapy

Reference for susceptibility of organisms (Tips from the Clinical Experts). March p. 15

Assisted reproductive technology

September CLIA'88 discusses ART test regulation, makes recommendations to CDC on genetic test regulation (POL Adviser). Nov p. 14

Automation

 (see also *Computers*)

Leveling the playing field: The economics of robotics in the hospital clinical lab. Jan p. 42

Modular stepwise automation and the future of diagnostic testing: Part 1. April p. 22

Modular stepwise automation and the future of diagnostic testing: Part 2. June p. 46

Awards

Awards for laboratorians (Letters to the Editor). Oct p. 8

Awards for outstanding laboratorians (Management Q & A). June p. 14

Billing (see *Reimbursement*)

Blood banking

Blood bank computer verification (Tips from the Clinical Experts). May p. 56

Computerizing the transfusion service department: One laboratory's experience. Aug p. 44

Conquering performance improvement documentation for JCAHO. June p. 18

Implementing the ISBT 128 labeling standard in a transfusion service. May p. 19

A primer on placental blood banking. Oct p. 22

Promising antiviral technology for blood products (News Worthy). March p. 68

Responsibilities of a blood collection facility manager (Management Q & A). Aug p. 26

Surgeon General outlines HCV look-back plan; CDC recommends protocol when labs must be closed (Washington Report). May p. 12

Bone marrow testing (see *Leukemia*)

Bone marrow transplantation

Autologous bone marrow transplant: A medical technologist/patient's experience. April p. 46

A primer on placental blood banking. Oct p. 22

Boric acid

Preserving 24-hour urine samples (Tips from the Clinical Experts). Nov p. 8

Business partnerships

Are we being needled by a monopoly? (From the Editor's Desk). July p. 6

Make your best offer (From the Editor's Desk). Aug p. 6

Cancer

 (see also *Leukemia*)

Autologous bone marrow transplant: A medical technologist/patient's experience. April p. 46

Ethics and cancer detection (Letters to the Editor). April p. 9

New blood test finds cancer before the occurrence of other symptoms (News Worthy). June p. 8

New technologies (News briefs). April p. 56

New test: Free PSA (News briefs). May p. 8

Prostate specific antigen and prostate cancer. Sept p. 28

PSA screening (Tips from the Clinical Experts). July p. 12

Research: Cervical cancer (News briefs). May p. 8

Cardiac markers

CK-MB cutoff values (Tips from the Clinical Experts). Aug p. 16

Career advocacy

As others see us (Guest Editorial). June p. 6

Goals and the annual report: A system for performance evaluation. July p. 54

Career development

Back to basics: Career challenges for the laboratorian. June p. 44

Making a difference, one child at a time. Dec p. 40

New frontiers for laboratorians (Management Q & A). April p. 20

Practical strategies for refocusing your career. March p. 41

Remapping career paths in a rural laboratory. March p. 28

The road to success (From the Editor's Desk). March p. 6

Change and adaptation

The adaptability of the laboratorian (From the Editor's Desk). Jan p. 6

Laboratory consolidation: Minimizing the angst and aggravation. July p. 66

Practical strategies for refocusing your career. March p. 41

A principle-focused approach to lab management. Jan p. 46

Teaching laboratorians new technologies (Management Q & A). Sept p. 20

Children

 (see also *Infants*)

A primer on placental blood banking. Oct p. 22

Making a difference, one child at a time. Dec p. 40

Chlamydia

Amplified DNA technology: Where does it fit in? July p. 40

CLIA'88

CLIA'88 (Letters to the Editor). Sept p. 8

CLIA'88 meeting minutes (POL Adviser). July p. 28

The Joint Commission and CLIA: A 5-year retrospective. Feb p. 46

MLO's national CLIA'88 survey, Part 1: The self-assessment survey. Jan p. 36

MLO's national CLIA'88 survey, Part 2: Praise versus protest: Views from both sides of the fence. June p. 36

Quality control on semen analysis (Tips from the Clinical Experts). Dec p. 8

Communications

As others see us (Guest Editorial). June p. 6

Back to basics: Career challenges for the laboratorian. June p. 44

Balanced Budget Act creates window of opportunity; user fees threaten reimbursement (POL Adviser). May p. 16

Complaining loudly and often (From the Editor's Desk). May p. 6

Intranets: Virtual procedure manuals for the pathology lab. Aug p. 65

Maintaining the chain of command (Management Q & A). Oct p. 18

Science-media communication gap (News briefs). June p. 8

Compliance (see *Legal issues; Reimbursement*)

Computers

Avoiding Y2Kaos. Dec p. 14

Blood bank computer verification (Tips from the Clinical Experts). May p. 56

Computerizing the transfusion service department: One laboratory's experience. Aug p. 44

Intranets: Virtual procedure manuals for the pathology lab. Aug p. 65

MLO's survey of computer use in the laboratory. Aug p. 56

New frontiers for laboratorians (Management Q & A). April p. 20

Preparing healthcare for the new millennium (From the Editor's Desk). Dec p. 6

Shareware and Web sites (Tips from the Clinical Experts). Jan p. 12

Validating your laboratory information system. Aug p. 32

Year 2000 could jeopardize Medicare payments (Washington Report). Aug p. 20

Consolidation (see *Reorganization*)

Consulting

Finding the right consultant. Feb p. 42

Continuing education (see *Education*)

Continuous quality improvement (CQI)

 (see *Quality control/improvement*)

Creativity

Giving the lab a facelift (Management Q & A). March p. 18

"Morty" show in British hospital (News Worthy). May p. 8

Wanted: Creative ideas! April p. 44

Critical limits (see also *Reference intervals, Toxicity levels*)

CLR critical limits (Tips from the Clinical Experts). July p. 8

Samples for blood gas critical limits (Tips from the Clinical Experts). Aug p. 14

Table of critical limits. CLR p. 10

Cross-training

Cross-training and quality standards (Management Q & A). Feb p. 18

Laboratory consolidation: Minimizing the angst and aggravation. July p. 66

Remapping career paths in a rural laboratory. March p. 28

Subject Index Page 46

Validating your laboratory information system. Aug p. 32

Year 2000 could jeopardize Medicare payments (Washington Report). Aug p. 20

Consolidation (see *Reorganization*)

Consulting

Finding the right consultant. Feb p. 42

Continuing education (see *Education*)

Continuous quality improvement

(*CQI*) (see *Quality control/improvement*)

Creativity

Giving the lab a facelift (Management Q & A). March p. 18

"Morty" show in British hospital (News Worthy). May p. 8

Wanted: Creative ideas! April p. 44

Critical limits (see also *Reference intervals, Toxicity levels*)

CLR critical limits (Tips from the Clinical Experts). July p. 8

Samples for blood gas critical limits (Tips from the Clinical Experts). Aug p. 14

Table of critical limits. CLR p. 10

Cross-training

Cross-training and quality standards (Management Q & A). Feb p. 18

Laboratory consolidation: Minimizing the angst and aggravation. July p. 66

Remapping career paths in a rural laboratory. March p. 28

Customer relations

- Boosting phlebotomist morale (Management Q & A). Oct p. 16
- Deferring profit to patient care (From the Editor's Desk). April p. 6
- Great service guaranteed! Feb p. 38
- Improperly labeled specimens (Management Q & A). March p. 20
- A principle-focused approach to lab management. Jan p. 46
- Should managers allow techs to advise physicians? (Management Q & A). Feb p. 19

Diabetes

- Diabetes: Targeting an old adversary. April p. 30
- New technologies (News briefs). April p. 56

Discipline and counseling

- Ethos and the laboratory leader. March p. 60
- Handling employees who cry (Management Q & A). Jan p. 19
- Helping employees deal with personal problems (Management Q & A). Aug p. 24
- How to handle problem staffers. Aug p. 76
- Okay to grant employees unscheduled time off? (Management Q & A). March p. 20
- Sick leave policies (Management Q & A). Feb p. 19

Discrimination

- Evangelizing in the lab (Management Q & A). April p. 19
- Overweight employee shunned (Management Q & A). Jan p. 20

Disease prevention

- Diabetes: Targeting an old adversary. April p. 30
- Edible vaccines (News Worthy). Jan p. 10
- Emerging superbug: *Staphylococcus aureus* becomes less susceptible to vancomycin. Jan p. 26
- Needlesticks: Who pays the price when costs are cut on safety? July p. 30
- New federal guidelines for hepatitis C virus look-back. Sept p. 23
- Postexposure treatment of HIV (News Worthy). Jan p. 8
- Promising antiviral technology for blood products (News Worthy). March p. 68
- Routine vaginal cultures (Tips from the Clinical Experts). Aug p. 14
- Surgeon General outlines HCV look-back plan; CDC recommends protocol when labs must be closed (Washington Report). May p. 12

DNA analysis

- Amplified DNA technology: Where does it fit in? July p. 40

Down's syndrome

- First prenatal Down's syndrome test (News Worthy). Jan p. 8

Downsizing (see Reorganization)

Drug interactions

- Tests affected by Prozac (Tips from the Clinical Experts). Jan p. 16

Drug testing

- Incomplete TDM orders (Tips from the Clinical Experts). June p. 10
- Low molecular weight heparins: How they work, what they do. June p. 26
- Peaks and troughs in TDM (Tips from the Clinical Experts). March p. 12
- Policy: Home drug tests (News briefs). May p. 8
- TDM draw times (Tips from the Clinical Experts). April p. 13

Education (see also Cross-training)

- Back to basics: Career challenges for the laboratorian. June p. 44
- Computerizing the transfusion service department: One laboratory's experience. Aug p. 44
- Condom use and AIDS (Letters to the Editor). April p. 9
- Continuing education resources for laboratorians. CLR p. 15
- Cross-training and quality standards (Management Q & A). Feb p. 18

JAMA article causes uproar in POLs (News Worthy). April p. 8

The Joint Commission and CLIA: A 5-year retrospective. Feb p. 46

Journey to the millennium: Mentoring in the clinical laboratory. May p. 44

Mentoring for laboratorians (Management Q & A). April p. 16

New frontiers for laboratorians (Management Q & A). April p. 20

Optimizing your instrument training experience. Sept p. 42

Practical strategies for refocusing your career. March p. 41

Teaching laboratorians new technologies (Management Q & A). Sept p. 20

Battle brewing over medical record privacy (Washington Report). Jan p. 18

Battle rages over managed care reform; Device manufacturers lag in Y2K compliance (Washington Report). Sept p. 14

Buddy up with a lawyer, it's compliance program time (POL Adviser). Jan p. 21

Complaining loudly and often (From the Editor's Desk). May p. 6

Fighting the fraud police (News Worthy). Jan p. 10

Grassroots lobbying update: Competitive bidding for Medicare: Direct supervision requirements; and CLIA audits CPT coding (POL Adviser). June p. 16

HCFA marshals CLIA surveyors in anti-fraud campaign; FDA hands out CLIA waivers (Washington Report). April p. 14

HCFA to devise uniform Medicare payment policies; FDA exempts some devices from premarket review (Washington Report). March p. 16

Justice department investigates GPOs for antitrust violations (News Worthy) Dec p. 7

Lab industry and others take on False Claims Act (Washington Report). July p. 16

Lab operators confront sweeping Medicare changes; HCFA offers compliance guidance (Washington Report). Oct p. 14

Needlesticks: Who pays the price when costs are cut on safety? July p. 30

Negotiated rulemaking committee looks at frequency screens; new legislation introduced could benefit family caregivers (Washington Report). Nov p. 10

New federal guidelines for hepatitis C virus look-back. Sept p. 23

New Medicare rules to simplify billing; more IVDs exempt from FDA premarket review (Washington Report). June p. 12

Patients' bill of rights could mean less belt-tightening for labs (Washington Report). Feb p. 14

Public health labs win funds to handle bioterrorism. (Washington Report). Dec p. 10

Surgeon General outlines HCV look-back plan; CDC recommends protocol when labs must be closed (Washington Report). May p. 12

Year 2000 could jeopardize Medicare payments (Washington Report). Aug p. 20

1998 Editorial Index

Surgeon General outlines HCV look-back plan; CDC recommends protocol when labs must be closed (Washington Report). May p. 12

HIV infection (see AIDS)

Immunization

Edible vaccines (News Worthy). Jan p. 10

Industry meetings

AACC/ASCLS in Chicago: It will blow you away!!! July p. 76

ASM in Atlanta—A peach of a conference. May p. 38

CLIAAC meeting minutes (POL Adviser). July p. 28

CLMA conference makes history in Philadelphia. Aug p. 84

Frontline Healthcare Workers Safety Foundation holds its 4th conference. Nov p. 51

Lab Institute '98. Aug p. 82

Infants

CLR critical limits (Tips from the Clinical Experts). July p. 8

Infant urine collection (Tips from the Clinical Experts). Oct p. 12

Phlebotomy from infants (Tips from the Clinical Experts). Jan p. 16

A primer on placental blood banking. Oct p. 22

Samples for blood gas critical limits (Tips from the Clinical Experts). Aug p. 14

A neonatal ICU's evaluation of a point-of-care arterial blood gas measurement system. Sept suppl p. 18

Infectious diseases (see also AIDS, hepatitis)

The adaptability of the laboratorian (From the Editor's Desk). Jan p. 6

Amplified DNA technology: Where does it fit in? July p. 40

Cryptosporidium parvum (Letters to the Editor). Oct p. 8

Cryptosporidium parvum: Capturing an elusive parasite. July p. 50

An emerging superbug: *Staphylococcus aureus* becomes less susceptible to vancomycin. Jan p. 26

Follow-up: Resistant bacteria (News briefs). April p. 8

Identifying strains of *E. coli* (Tips from the Clinical Experts). April p. 10

MIC for *Streptococcus pneumoniae* (Tips from the Clinical Experts). Aug p. 16

Promising antiviral technology for blood products (News Worthy). March p. 68

Surgeon General outlines HCV look-back plan; CDC recommends protocol when labs must be closed (Washington Report). May p. 12

Inspections/accreditation

Can quality survive the future? (Management Q & A). Jan p. 20

CLIAAC meeting minutes (POL Adviser). July p. 28

Conquering performance improvement documentation for JCAHO. June p. 18

Grassroots lobbying update: Competitive bidding for Medicare; Direct supervision requirements; and CLIA audits CPT coding (POL Adviser). June p. 16

HCFA marshals CLIA surveyors in anti-fraud campaign; FDA hands out CLIA waivers (Washington Report). April p. 14

JAMA article causes uproar in POLs (News Worthy). April p. 8

The Joint Commission and CLIA: A 5-year retrospective. Feb p. 46

MLO's national CLIA '88 survey, Part 1: The self-assessment survey. Jan p. 36

MLO's national CLIA '88 survey, Part 2: Praise versus protest: Views from both sides of the fence. June p. 36

PSA screening (Tips from the Clinical Experts). July p. 12

Regulatory Update: CLIAAC convenes its gene testing subcommittee and resurrects PT subcommittee; HCFA stats show improved inspection outcomes; new waived tests on CDC Web site (POL Adviser). March p. 24

Validating your laboratory information system. Aug p. 32

Instrumentation (see also Computers)

A neonatal ICU's evaluation of a point-of-care arterial blood gas measurement system. Sept suppl p. 18

A point-of-care testing program in the ICU: Thoughts for hospital laboratorians. Sept suppl p. 12

New Medicare rules to simplify billing; more IVDs exempt from FDA premarket review (Washington report). June p. 12

Patients' bill of rights could mean less belt-tightening for labs (Washington Report). Feb p. 14

Management issues

Awards for outstanding laboratorians (Management Q & A). June p. 14

Boosting phlebotomist morale (Management Q & A). Oct p. 16

Bringing home work (Management Q & A). Aug p. 22

The central laboratory: Who needs it? July p. 60

Chief technologist intimidates staff into falsifying QC (Management Q & A). July p. 17

Cross-training and quality standards (Management Q & A). Feb p. 18

Drawing the plays with self-directed work teams. Nov p. 16

Embracing the absurd (From the Editor's Desk). Nov p. 6
Ethos and the laboratory leader. March p. 60
Evangelizing in the lab (Management Q & A). April p. 19
Finding the right consultant. Feb p. 42
Giving the lab a facelift (Management Q & A). March p. 18
Great service guaranteed! Feb p. 38
Handling employees who cry (Management Q & A). Jan p. 19
Helping employees deal with personal problems (Management Q & A). Aug p. 24
How to handle problem staffers. Aug p. 76
How to plan and produce your laboratory test catalog. Dec p. 23
How to save time, money, and a precious resource via CQI. Jan p. 50
Increasing laboratory revenues (Management Q & A). Dec p. 12
Laboratory consolidation: Minimizing the angst and aggravation. July p. 66
Maintaining the chain of command (Management Q & A). Oct p. 18
Mentoring for laboratorians (Management Q & A). April p. 16
Multidepartmental management: The challenge of the new millennium. Oct p. 37
Okay to grant employees unscheduled time off? (Management Q & A). March p. 20
Overweight employee shunned (Management Q & A). Jan p. 20
A principle-focused approach to lab management. Jan p. 46
Provocative dress (Management Q & A). May p. 14
Resolving disputes over sharing and replacing lab equipment (Management Q & A). Nov p. 12
Responsibilities of a blood collection facility manager (Management Q & A). Aug p. 26
The road to success (From the Editor's Desk). March p. 6
Should managers allow techs to advise physicians? (Management Q & A). Feb p. 19
Sick leave policies (Management Q & A). Feb p. 19
Staff upset over pathologist cutting out early (Management Q & A). July p. 17
Teaching laboratorians new technologies (Management Q & A). Sept p. 20
Unions and the lab (Management Q & A). July p. 24
Wanted: Creative ideas! April p. 44

Medicare/Medicaid (see *Reimbursement*)

Meetings (see *Industry meetings*)

Mentoring

Journey to the millennium: Mentoring in the clinical laboratory. May p. 44
Mentoring for laboratorians (Management Q & A). April p. 16

Microbiology

The impact of specimen management in microbiology. May p. 28
Questioning basic microbiology (News briefs). June p. 8

Monopolization

Are we being needed by a monopoly? (From the Editor's Desk). July p. 6
Needlesticks: Who pays the price when costs are cut on safety? July p. 30

Muscle dysmorphia

The opposite of Karen Carpenter isn't John Candy (News Worthy). March p. 68

Mycobacterial testing

Culturing mycobacteria (Tips from the Clinical Experts). April p. 52
Susceptibility panels (Tips from the Clinical Experts). Jan p. 12

Myocardial markers

CK-MB cutoff values (Tips from the Clinical Experts). Aug p. 16
Routine coagulation tests. (Tips from the Clinical Experts). Dec p. 8

National surveys

MLO's national CLIA '88 survey, Part 2: Praise versus protest: Views from both sides of the fence. June p. 36
MLO's national CLIA '88 survey, Part I: The self-assessment survey. Jan p. 36

Newborns (see *Infants*)

Nutrition

Fecal fat from uncontrolled diet (Tips from the Clinical Experts). March p. 12

Occupational exposure

Justice department investigates GPOs for anti-trust violations (News Worthy). Dec p. 7
Needle safety (Letters to the Editor). Sept p. 8
Needlesticks: Who pays the price when costs are cut on safety? July p. 30
Postexposure treatment of HIV (News Worthy). Jan p. 8
Risks and recommendations for HIV occupational exposure. Sept p. 58

Outcome assessment

The laboratory's role in outcome assessment. Jan p. 54

Pap smear

Conflicting reports about innovations to the Pap smear (News Worthy). March p. 10
Neopath's AutoPap system approved for primary screening (News Worthy). June p. 8
Research: Cervical cancer (News briefs). May p. 8

Performance evaluation

Goals and the annual report: A system for performance evaluation. July p. 54
Satellite laboratories: A cost-benefit study. Nov p. 44

Performance improvement

The central laboratory: Who needs it? July p. 60
The competitive marketplace: An exciting future for laboratory medicine. Aug p. 52
Drawing the plays with self-directed work teams. Nov p. 16

Phlebotomy

Are we being needed by a monopoly? (From the Editor's Desk). July p. 6
Boosting phlebotomist morale (Management Q & A). Oct p. 16
In defense of the phlebotomist (Letters to the Editor). Jan p. 11
Elevated potassium levels (Tips from the Clinical Experts). Feb p. 10
How collaboration equals quality in maintaining POCT and phlebotomy programs. Oct p. 43
Needlesticks: Who pays the price when costs are cut on safety? July p. 30
Order of drawing capillary tubes (Tips from the Clinical Experts). May p. 10
Phlebotomy from infants (Tips from the Clinical Experts). Jan p. 16
PTT plasma separation (Tips from the Clinical Experts). Dec p. 8
Quality assurance in phlebotomy (Tips from the Clinical Experts). July p. 12

Physician office laboratories (POLs)

Balanced Budget Act creates window of opportunity; user fees threaten reimbursement (POL Adviser). May p. 16
Billing compliance strategies for physician office laboratories (POL Adviser). Oct p. 20
Buddy up with a lawyer, it's compliance program time (POL Adviser). Jan p. 21
CLIA meeting minutes (POL Adviser). July p. 28

Grassroots lobbying update: Competitive bidding for Medicare; Direct supervision requirements; and CLIA audits CPT coding (POL Adviser). June p. 16

JAMA article causes uproar in POLs (News Worthy). April p. 8

Regulatory update: CLIA convenes its gene testing subcommittee and resurrects PT subcommittee; HCFA stats show improved inspection outcomes; new waived tests on CDC Web site (POL Adviser). March p. 24

September CLIA discusses ART test regulation, makes recommendations to CDC on genetic test regulation (POL Adviser). Nov p. 14

Point-of-care testing

A point-of-care testing program in the ICU: Thoughts for hospital laboratorians. Sept suppl p. 12
A neonatal ICU's evaluation of a point-of-care arterial blood gas measurement system. Sept suppl p. 18
How collaboration equals quality in maintaining POCT and phlebotomy programs. Oct p. 43
The laboratory as a leader of point-of-care programs. Sept suppl p. 6
Point-of-care coag instruments (Tips from the Clinical Experts). April p. 13
Point-of-care integration—Our experience. Sept suppl p. 22
Point-of-care testing: A viable solution to turnaround time delays. Sept suppl p. 4
Point-of-care testing versus central lab costs. Sept p. 46

Potassium tests

Elevated potassium levels (Tips from the Clinical Experts). Feb p. 10

Pregnancy

First prenatal Down's syndrome test (News Worthy). Jan p. 8
Genetic testing lab sued over prenatal test (News Worthy). Dec p. 7
Routine vaginal cultures (Tips from the Clinical Experts). Aug p. 14

Privacy, medical record

Battle brewing over medical record privacy (Washington Report). Jan p. 18

Problem employees

Evangelizing in the lab (Management Q & A). April p. 19
Handling employees who cry (Management Q & A). Jan p. 19
Helping employees deal with personal problems (Management Q & A). Aug p. 24
How to handle problem staffers. Aug p. 76
Provocative dress (Management Q & A). May p. 14

Problem managers

Chief technologist intimidates staff into falsifying QC (Management Q & A). July p. 17

Procedures, policies, protocol

CK-MB cutoff values (Tips from the Clinical Experts). Aug p. 16
CLR critical limits (Tips from the Clinical Experts). July p. 8
Conquering performance improvement documentation for JCAHO. June p. 18
Culturing mycobacteria (Tips from the Clinical Experts). April p. 52
Diabetes: Targeting an old adversary. April p. 30
Drawing from IV lines (Tips from the Clinical Experts). Feb p. 12
Elevated potassium levels (Tips from the Clinical Experts). Feb p. 10
Fecal fat from uncontrolled diet (Tips from the Clinical Experts). March p. 12
Great service guaranteed! Feb p. 38
Health officials recommend rapid HIV test (News Worthy). May p. 8
How to plan and produce your laboratory test catalog. Dec p. 23
The impact of specimen management in microbiology. May p. 28
